## Parental Controls information

### Type of guide

Smartphones and other devices

---

### Features and Benefits

Android smartphones have parental controls for the Play store but not on the device itself. These allow you to set the maturity level of apps and set a PIN code for purchases.

---

### What specific content can I restrict?

Apps Access

In App purchasing

Online games

---

### What do I need?

You will need your Google account email and password for the device.

# Android Smartphone guide

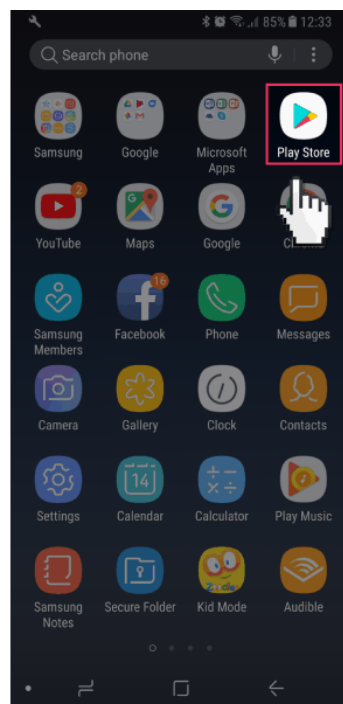

When setting up your phone you will need to activate a Google account on the handset. You can use your own Google account or create/use the account of your child. You will be enabling a PIN on the handset that you will be using to set parental controls.

# Android Smartphone guide

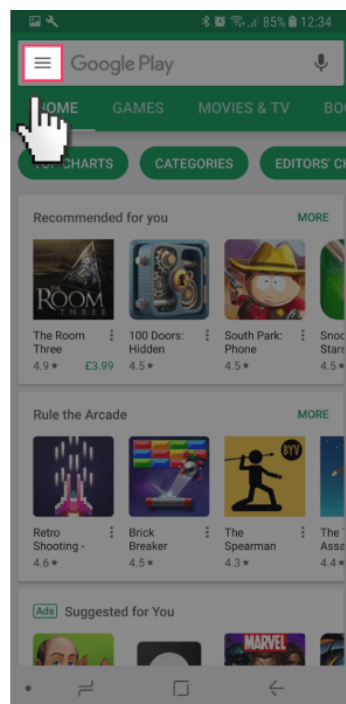

Launch the Google “Play Store” application on your handset.

# Android Smartphone guide

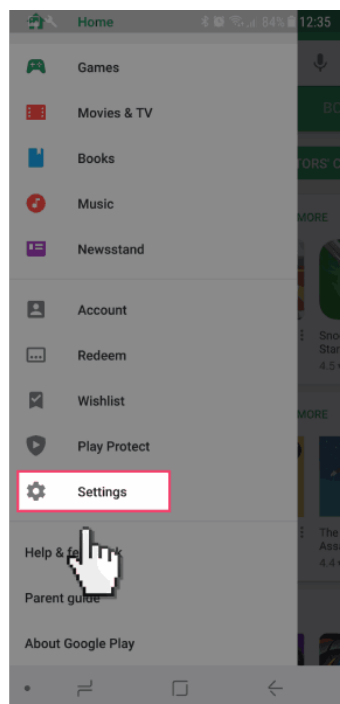

Tap the menu button.

# Android Smartphone guide

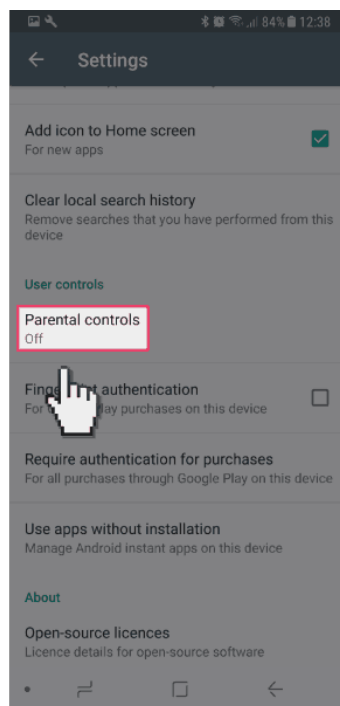

From the pop out menu scroll down and tap “Settings”.

# Android Smartphone guide

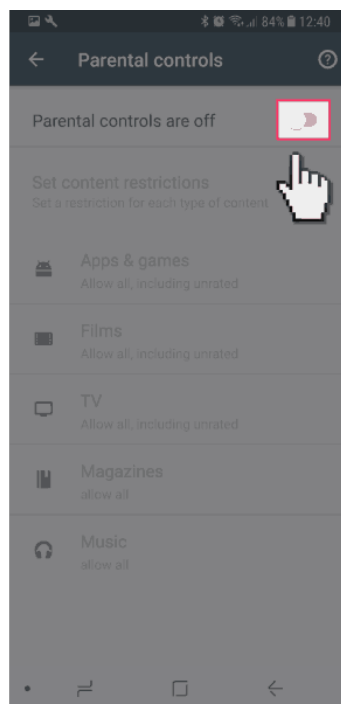

In the “Settings” section scroll down and tap on “Parental controls”.

# Android Smartphone guide

Enable parental controls by tapping on the radio button.

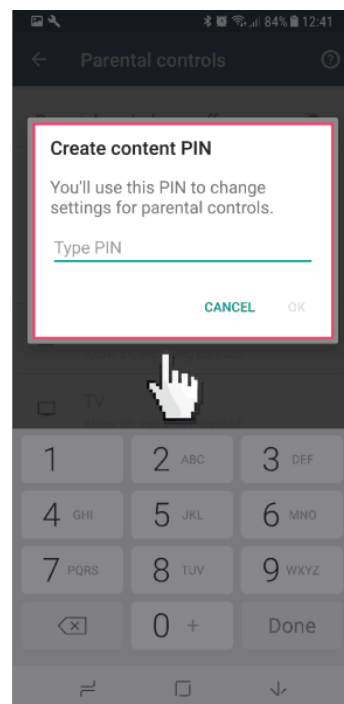

# Android Smartphone guide

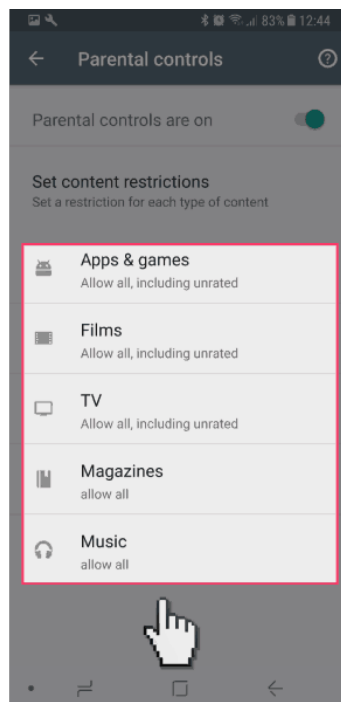

You will be now prompted to create a PIN.

# Android Smartphone guide

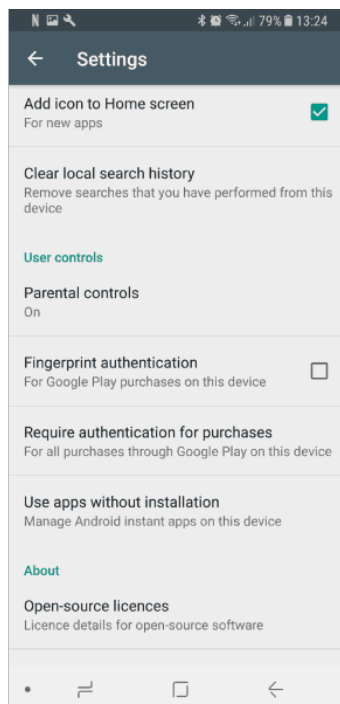

You can now set restrictions for “Apps & games”, “Films”, “TV”, “Magazines” and “Music” all of which are accessed via the Play Store.

# Android Smartphone guide

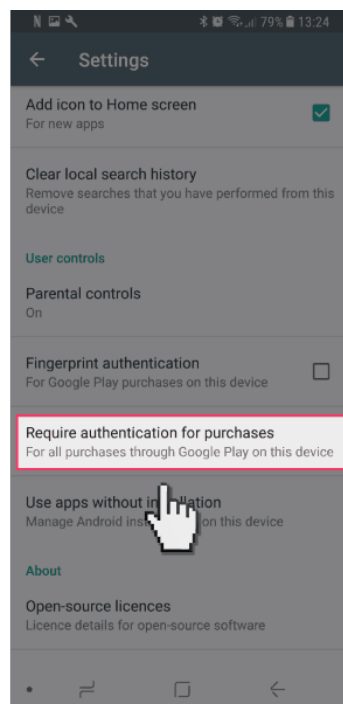

Now we will enable your handset to require the Google account password when making purchases. Return to the “Settings” menu within the “Play Store” app (Steps 2-4).

# Android Smartphone guide

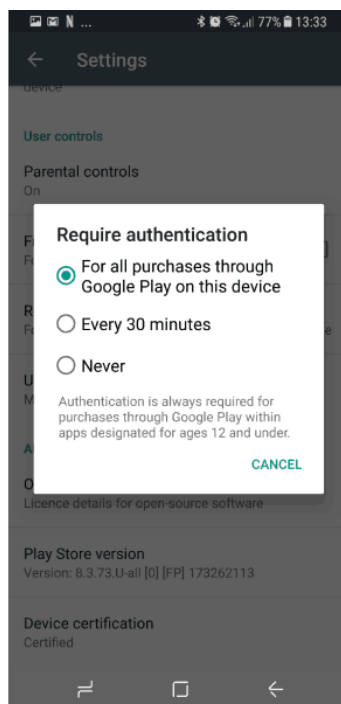

Scroll down and select “Require authentication for purchases”.

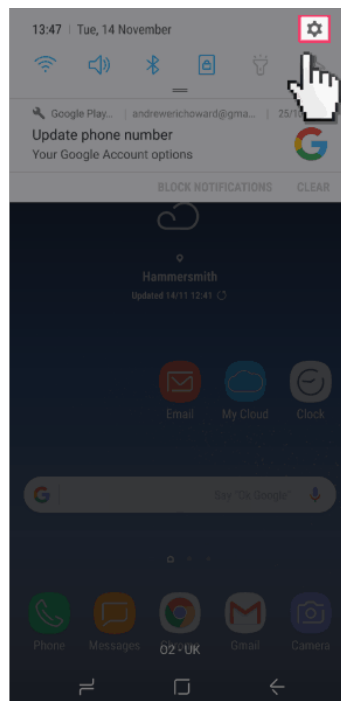

# Android Smartphone guide

- On the “Require authentication” pop-up you can select to require your Google account password for all purchases, open a 30-minute window where all purchases are allowed after inputting your password, or disable authentication entirely.

# Android Smartphone guide

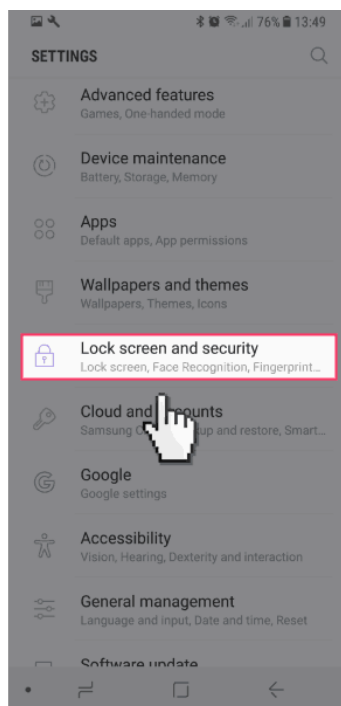

- Finally, we will now block the device from being able to install applications from services other than the “Play store” where we have placed the restrictions. From your devices “home Screen” swipe down from the top of the screen and then select the settings cog.

# Android Smartphone guide

From the “SETTINGS” menu scroll down to “Lock screen and security”.

# Android Smartphone guide

Scroll down to the section names “Unknown sources” and ensure that the toggle switch is set to off.
